

Technical Bulletin

Manufacturer: General Motors (TSB 05-03-10-015B)

Service Plus Group: 09-16-0209

Subject: Tire Rotation on Vehicles with Different Front and Rear Tires/Wheel Sizes

Model: 2004-2009 Cadillac SRX
2005-2009 Cadillac STS with V8 Luxury Package Only
2006-2009 Cadillac STS-V, XLR-V
2009 Cadillac CTS-V
2003-2006 Chevrolet SSR
2005-2009 Chevrolet Corvette
2005-2008 Pontiac Grand Prix GXP

NOTE

The 2007-2009 Cadillac SRX Sport with RPO R1T is equipped with 20" wheels. The front and rear tire/wheel assemblies are the same size. Customers with this vehicle are able to rotate their tires.

IMPORTANT

The above listed vehicles are manufactured with tire/wheel assemblies that are different from front to rear. In this case, the tires should not be rotated.

If the customer requests to have the tires rotated during normal maintenance, explain to them that the tire/wheel assemblies of their vehicle were designed to be different sized to enhance the vehicle's handling performance.

IMPORTANT

Changing the tire/wheel sizes or rotating the tires may affect the vehicle's handling and ride characteristics. GM DOES NOT recommend changing the OEM tires or wheels.
